### MOT/HOA

#### Hungarian Orthopaedic Association Magyar Ortopéd Társaság

HOA is a non-profit organisation with the goal of facilitating, supporting and enhancing the activity of orthopaedic surgeons working in Hungary. It has approximately 300 active members.

The Association has a comprehensive web portal providing information on daily orthopaedic practice, education, meetings, instructional courses and lectures. Our orthopaedic newsletter is published on a regular basis. Online education materials and e-learning modules are also available, as is a web-based emailing tool for the Hungarian orthopaedic community.

HOA organises an annual congress with international participation, and also a trainees' meeting at which young colleagues and researchers can present their work. Every autumn HOA organises a 'Prosthetic Round Table' on advances in endoprosthesis devices. EFORT regularly presents its instructional course lectures at one of the country's most prestigious orthopaedic departments.

The HOA portal hosts the Hungarian National Arthroplasty Register, which is part of EFORT's European Arthroplasty Register (EAR).

HOA has established the Dollinger Club for all members who have received the Dollinger pro meritis award.
